COMPANY ORGANIZATIONAL STRUCTURE

THE CORE BOARD OF DIRECTOR

Indonesia is one of the world's largest sources of coconut-based biomass, making it a key supplier of high-quality charcoal and activated carbon.

Today, coconut shell-based activated carbon plays a vital role in industrial water treatment systems (WTP), effectively removing chlorine, organic compounds, and contaminants.

With its high adsorption capacity and eco-friendly properties, it has become a preferred solution for clean water production and sustainable industrial operations.

HOW WE ARE

A LEGACY OF QUALITY

CV Sandhya Agni Nusantara, commonly known as Sang Nus a, was established in December 2019. We began with a commitment to harnessing Indonesia's natural resources to provide high-quality carbon products to the global market. Our journey started in the heart of the coconut charcoal industry, where we perfected the art of carbonization for premium shisha and BBQ applications.

STRATEGIC EVOLUTION

As global industrial needs evolved, so did we. Today, SANG NUSA has successfully expanded its operations into the Activated Carbon sector, moving directly into the water treatment plant industry with a specialization in high-performance media for water purification and mineral processing

We pride ourselves on our ability to transform raw materials like coconut shells, coal, and wood into essential industrial tools through advanced manufacturing and strict quality contr

OUR STRATEGIC JOURNEY

Strategize Wisely, Expand Rapidly

INNOVATION & DIVERSIFICATION Present

Strategically pivoted towards Activated Carbon production. Leveraging deep expertise to serve critical sectors like Water Treatment Plants and Gold Extraction industries

GLOBAL EXPANSION 2020 - 2023

Successfully exported to over 15 countries across Europe, the Middle East, and the Americas.

Established Sang Nusa as a reliable international supplier of coconut-based products.

FOUNDATIONS 2019

Established in December 2019, focusing on premium Shell Coconut CHARCOAL FOR THE GLOBAL SHISHA AND BBQ markets. Built a reputation for high-quality processes

OUR PRODUCT

PREMIUM SHISHA

CV Sandhya Agni Nusantara is a leading Indonesian producer of premium coconut shell charcoal briquettes for the global Shisha and BBQ markets. 50 containers per month (1,250 tons)

We combine eco-friendly processes with international export standards—serving markets across Russia, Brazil, Europe, and the USA—to ensure superior fuel efficiency and trusted long-term partnerships.

SHELL COCONUT CHARCOAL RAW MATERIAL

CV Sandhya is a trusted exporter of high-quality raw coconut shell charcoal. With a proven track record of supplying the Middle Eastern and European markets, we maintain a consistent production capacity of 5 to 10 tons to meet our clients' industrial needs

Is here to fulfil the needs and coconut shell charcoal consumption both local and abroad.

PREMIUM ACTIVATED CARBON SOLUTIONS

Production Capacity: 300 MT / Month

Export Markets: China, Taiwan, & Middle East

- COCONUT SHELL BASED

High microporosity. Ideal for drinking water purification and gold recovery.

- COAL BASED

High mesoporosity. Ideal for wastewater treatment and large molecule adsorption.

- WOOD BASED

Large macropores. Ideal for decolorization, chemical purification, and air filtration.

WATER TREATMENT PLANT INDUSTRY

SANG NUSA delivers innovative water management through our brand, WATER AS A SERVICE—a comprehensive solution for efficient and sustainable industrial Water Treatment Plants(WTP).

To date, we have successfully implemented various strategic projects across the domestic market, serving as a trusted partner for the Hospitality & Commercial and Industrial & Pharmaceutical sectors. Our dedication is centered on ensuring premium water quality to support your business operations seamlessly.

APPLICATIONS & SOLUTIONS

SHISHA BRIQUETTE PREMIUM

Shisha charcoalbriquette are made from coconut shellscharcoal. it is kind of high-qualityWe produce coconut charcoal in a modern way with advanced machines and expert in the field of charcoal production. we make the best coconut charcoal briquette from indonesia, for shisha/hookah we make from 100% pure coconut shell, all of our product is free from any chemica. we bring the material from the best coconuts sources on the islands of Sumatra and Sulawesi, Indonesia. We accept orders from OEM/private brands and are willing to customize everything to your taste. we also ensure absolute confidentiality between. charcoal product specially designed and manufactured for hookah users. cubic shisha charcoal is non-flammable, which needs a gas stove to ignite. compared with the round shape shisha charcoal, the burning time of cubic hookah is longer. CV Sandhya Agni Nusantara

 ECO FRIENDLY 100 % NATURAL & CHEMICAL FREE	 GLOWING HEAT FOR UNFORGETTABLE EXPERIENCE	 LONG LASTING UP TO 90 MINUTES OF SMOKING	 ASH LESS LESS ASH BY 2-3 % MAXIMUM	 LESS WATER CONTENT 3-7% MAXIMUM

APPLICATIONS & SOLUTIONS SHELL COCONUT CHARCOAL RAW MATERIAL

CV Sandhya is a premium exporter of high-quality coconut shell charcoal, serving European, Middle Eastern, and domestic markets with a consistent capacity of 5–10 tons. Product Applications; Briquette Raw Material: Premium grade for Shisha and BBQ. Industrial: Coconut shell-based activated carbon for water filtration and chemical purification

Key Advantages; Our charcoal features ultra-low moisture content and produces a clean, white-as-grey ash finish

APPLICATIONS & SOLUTIONS

PREMIUM ACTIVATED CARBON SOLUTIONS

CV Sandhya Agni Nusantara delivers a premier line of high-quality Activated Carbon, engineered for maximum efficiency in water purification, industrial processing, and gold extraction optimization. Discover a new standard of purity through our certified activated carbon technology. From water clarification to the mining industry, our Prime Gold and Prime Soft products set a new benchmark in adsorption capacity and durability. Featuring an Iodine Number of up to 1,210 mg/gr and an optimized pore structure, we ensure that every carbon granule provides superior filtration performance.

APPLICATIONS & SOLUTIONS WATER TREATMENT PLANT INDUSTRY

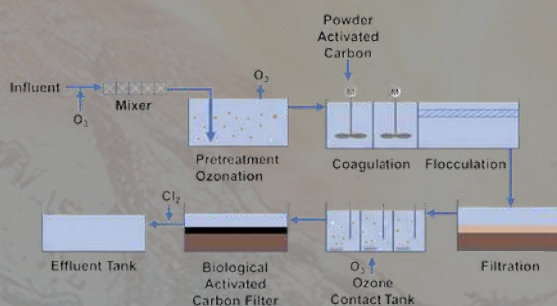

SANG NUSA is at the forefront of integrated environmental solutions—combining intelligent water management through its Water as a Service platform with high-performance activated carbon technology. Our coconut shell-based activated carbon, derived from renewable resources, is engineered for exceptional adsorption efficiency, supporting critical applications in water purification, air filtration, and gold recovery processes.

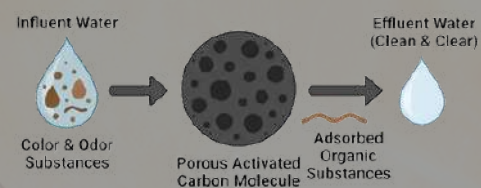

Backed by a solid portfolio of strategic implementations, we serve as a trusted partner to the Hospitality, Commercial, Industrial, Pharmaceutical, and Mining sectors.

We are committed to delivering sustainable, high-impact solutions that enhance operational performance, ensure regulatory compliance, and create long-term value for our partners worldwide.

WATER TREATMENT SOLUTIONS

Adsorption Process

We deliver integrated solutions for industrial and commercial water treatment, supported by high-performance activated carbon for effective removal of chlorine, organic compounds, odors, and impurities.

Applications:

- Industrial Water Treatment Plants (WTP)
- Wastewater Treatment Systems (WWTP)
- Drinking Water Purification
- Food & Beverage Processing

APPLICATIONS & SOLUTIONS

AIR FILTRATION & PURIFICATION

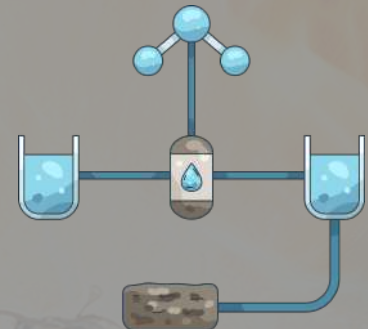

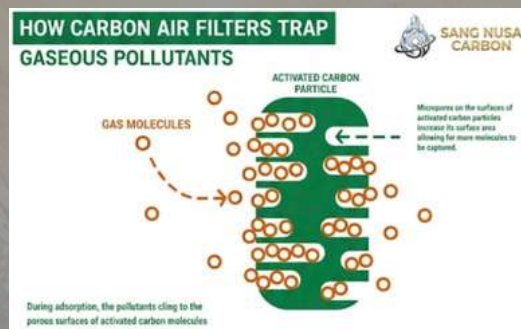

Our activated carbon solutions are engineered to efficiently adsorb harmful gases, VOCs, and odors, ensuring cleaner, safer, and compliant air across various industrial and commercial environments.

Produced from high-quality coconut shell raw materials, our activated carbon delivers consistent performance, high adsorption capacity, and reliable durability for demanding applications.

CV Sandhya Agni Nusantara (SANG NUSA) is committed to delivering dependable and high-quality solutions, supported by industry expertise and a strong focus on operational excellence. We have established ourselves as a competent and trusted partner, capable of meeting the evolving environmental and industrial requirements of our clients.

We deliver reliable performance and consistent quality to support your business with confidence.

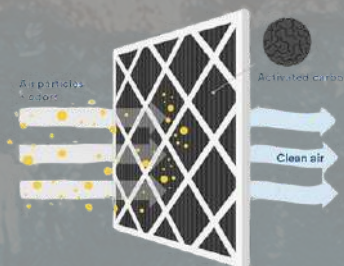

WATER TREATMENT SOLUTIONS

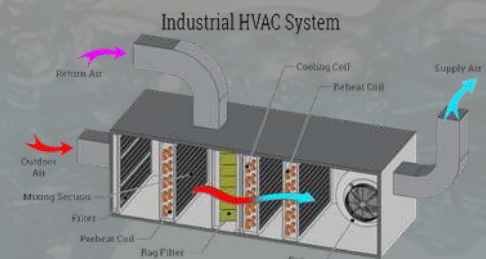

Our activated carbon solutions are designed to adsorb harmful gases, VOCs, and odors, ensuring cleaner and safer air across industrial and commercial environments.

Applications:

- HVAC Systems
- Industrial Air Treatment
- Odor Control Systems
- Gas Purification Units

APPLICATIONS & SOLUTIONS

GOLD RECOVERY (MINING INDUSTRY)

We provide premium-grade activated carbon engineered for gold recovery applications, offering high adsorption efficiency, strong hardness, and low attrition loss for reliable performance in mining operations.

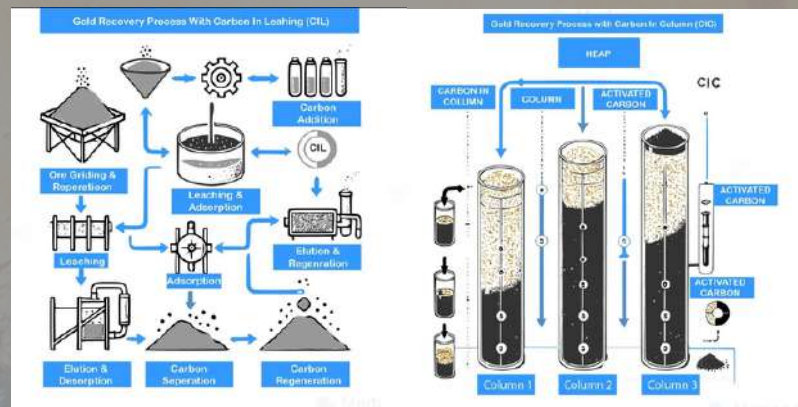

Produced from high-quality coconut shell raw materials, our products ensure consistent quality and durability, making them suitable for CIP, CIL, and CIC processes.

CV Sandhya Agni Nusantara (SANG NUSA) is committed to delivering dependable solutions, supported by industry expertise and a strong focus on quality. We have established ourselves as a competent and trusted partner in supporting efficient and reliable gold recovery operations.

We deliver consistent quality and performance you can rely on.

GOLD RECOVERY (MINING INDUSTRY)

We provide premium-grade activated carbon specifically engineered for gold recovery processes, delivering high adsorption efficiency, superior hardness, and low attrition loss.

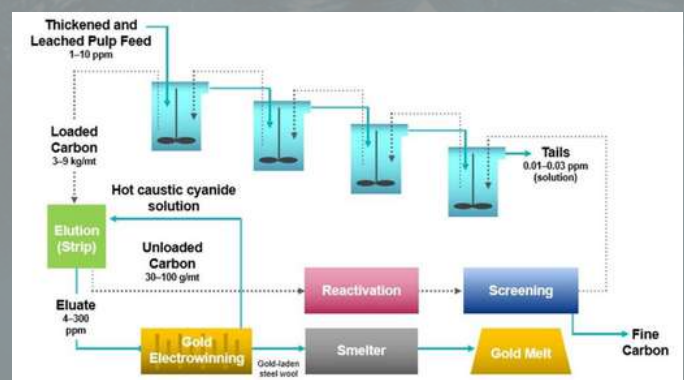

CIP (Carbon in Pulp)

CIC (Carbon in Column)

Applications:

- CIP (Carbon in Pulp)
- CIL (Carbon in Leach)
- CIC (Carbon in Column)
